Complete the calculations.

$$5\frac{3}{4} - 1\frac{3}{8} =$$

$$4\frac{7}{20} - 2\frac{7}{10} =$$
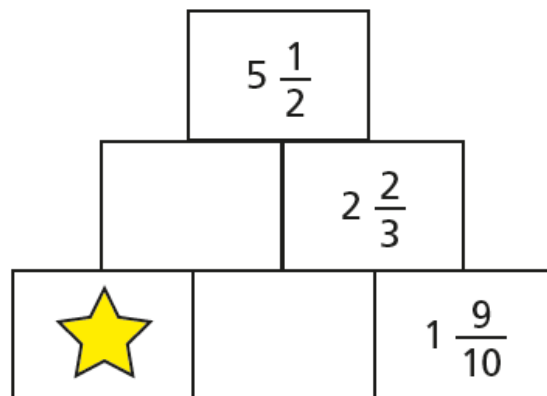

$$6\frac{1}{5} - 1\frac{3}{4} =$$

$$6\frac{5}{6} - 4\frac{2}{9} =$$

Filip has $4\frac{2}{5}$ kg of potatoes.

He has $2\frac{3}{4}$ kg of carrots.

How much heavier are the potatoes than the carrots?

In this addition pyramid, a number is the sum of the two numbers below it.

Work out the value of the star.

$$8 - \boxed{} = 3\frac{3}{4}$$

$$8\frac{1}{8} - \boxed{} = 2\frac{7}{8}$$

Working Deeper

Here is Rosie's method.
What is the calculation?
