

Paper windmill

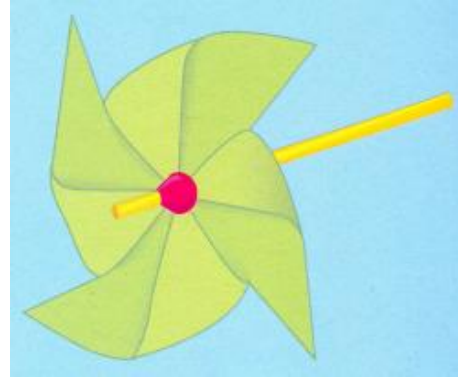

You will need a square of paper, scissors, 2 straws , paper clip, blu tac or sellotape, glue.

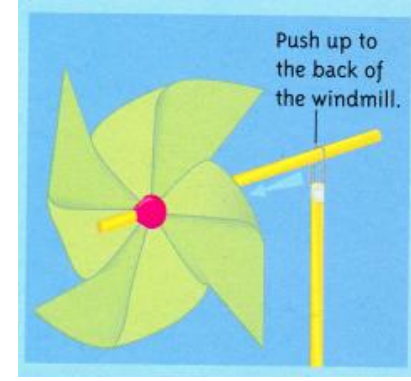

1. Start with a square of paper 10cm x 10cm. Cut down from each point HALFWAY to the centre.

2. Bring the corners marked with a red dot to the centre. Let them stay curved and don't fold them flat. Put a small dab of glue on them to hold them down.

3. Carefully make a hole in the centre with a pencil and push a straw through. Keep it in place with a little blu tac.

4. Tape a paperclip to a second straw .
5. Push the windmill straw through the paper clip, almost up to the windmill itself.

6. Hold the upright straw and blow to the side of the windmill to watch it spin.
