

Finding Fractions of Amounts

1) $\frac{1}{5}$ of 50

2) $\frac{3}{5}$ of 35

3) $\frac{1}{7}$ of 21

4) $\frac{5}{7}$ of 70

5) $\frac{3}{4}$ of 84

6) $\frac{2}{3}$ of 666

7) $\frac{5}{6}$ of 360

8) $\frac{3}{4}$ of 1824

Challenge:

Dave says that it is possible to find $\frac{3}{5}$ of 423.

Is he right?

Explain why/ why not.
