

*should be ticked.*

*The apples should be split into groups of three.*

*There are various possible answers, e.g. 3, 4, 5 apples circled.*

*Ben and Zahra are both correct.*

*They have both shaded equal parts of their shapes.*

*Answers should explain that any eight squares can be shaded on the grid.*

*There are several possibilities.*

*Four equal groups of eight are needed for each solution. These could be presented in any pattern or arrangement.*
