

Emily says,

45% is bigger than $\frac{4}{5}$

Is Emily correct?

Hassan scores 40 out of 80 in a test.

Kate scores 40% in the same test.

Who has the higher score?

Explain how you know.

Danyal is saving money. His dad offers him two lots of money.

60% of £35

45% of £48

Which should he take?

Explain your reasoning.

Working Deeper

On Friday, Ping read $\frac{2}{5}$ of his book.

On Saturday, he read 20%.

On Sunday, he read the **other** 80 pages to finish the book.

How many pages were there in Ping's book?
