

1

Alex has 13 flowers.

If she plants 2 flowers in each pot.
How many pots can she fill?

2

What if Alex grouped her flowers into pots of 3?

How many pots can she fill?
How many flowers will be remaining?

3

What if Alex grouped her flowers into pots of 4?

How many pots can she fill?

How many flowers will be remaining?

4

What if Alex grouped her flowers into pots of 3?

How many pots can she fill?

How many flowers will be remaining?

$$5 \quad 12 \div 5 =$$

$$13 \div 2 =$$

$$6 \quad 18 \div 4 =$$

$$20 \div 3 =$$
