Here are some 100 squares for you to cut into equal parts.

$$100 \div \text{circle} = \text{triangle} \times \text{square}$$

$$100 \div \text{square} = \text{square}$$

$$100 \div \text{triangle} = \text{square} + \text{square}$$

$$100 \div \text{star} = \text{square} + \text{square} + \text{triangle}$$

What is the value of each shape?
