

- 1 How do scientists make their discoveries?
- 2 What have you found out by playing with your magnet?
- 3 What can you do to learn more about your magnet?
- 4 What must you collect for this experiment?
- 5 Write the headings for your two lists of materials that have been tested.
- 6 What did you discover about the materials that were attracted by the magnet?
- 7 What would you expect to happen if you brought a magnet near a piece of iron that was covered with leather?
- 8 What must you remember to do when you are making these tests with your magnet?
