

The wonderful modern city is full of excitement and entertainment. In the middle of the city is a forum, it's a large area used as a market place. If you go there you will not be disappointed by the amount of fresh fruit and vegetables, baked goods and scrumptious fish and meat, you will also enjoy the wine available. Are you missing gladiator fights? Well miss them no more, we have our dear amphitheatre for your entertainments, a Circus for Chariot races, a theatre and public Room baths, these Roman baths are baths like you've never seen before, they are large with lots of different rooms. Here in Bath, England we have a very special public bath which is built on hot springs which have great healing powers, we have the most modern under floor heating system called hypocaust. What's not to love?
