So who was Greta Thunberg then?

Greta Thunberg is a Swedish **environmental activist** who is internationally known for challenging world leaders to take immediate action against climate change

The famous sign

“Skolstrejk för Klimatet”
(School Strike for Climate)

We are going to create our own placards about plastic pollution.

WE WANT CHANGE!

Think about plastic pollution. Can you come up with a catchy slogan to add to your own placards.

Slogan = a short and striking or memorable phrase

Plastic aint fantastic.

Please be the final straw

My Planet is Single Use

Use words and images to evoke a feeling!

Your placard could also contain shocking facts.

Over the past 50 years, world plastic production has doubled.

The average time that a plastic bag is used for is ... 12 minutes.

Since the 1950s, around 8.3 billion tons of plastic have been produced worldwide.

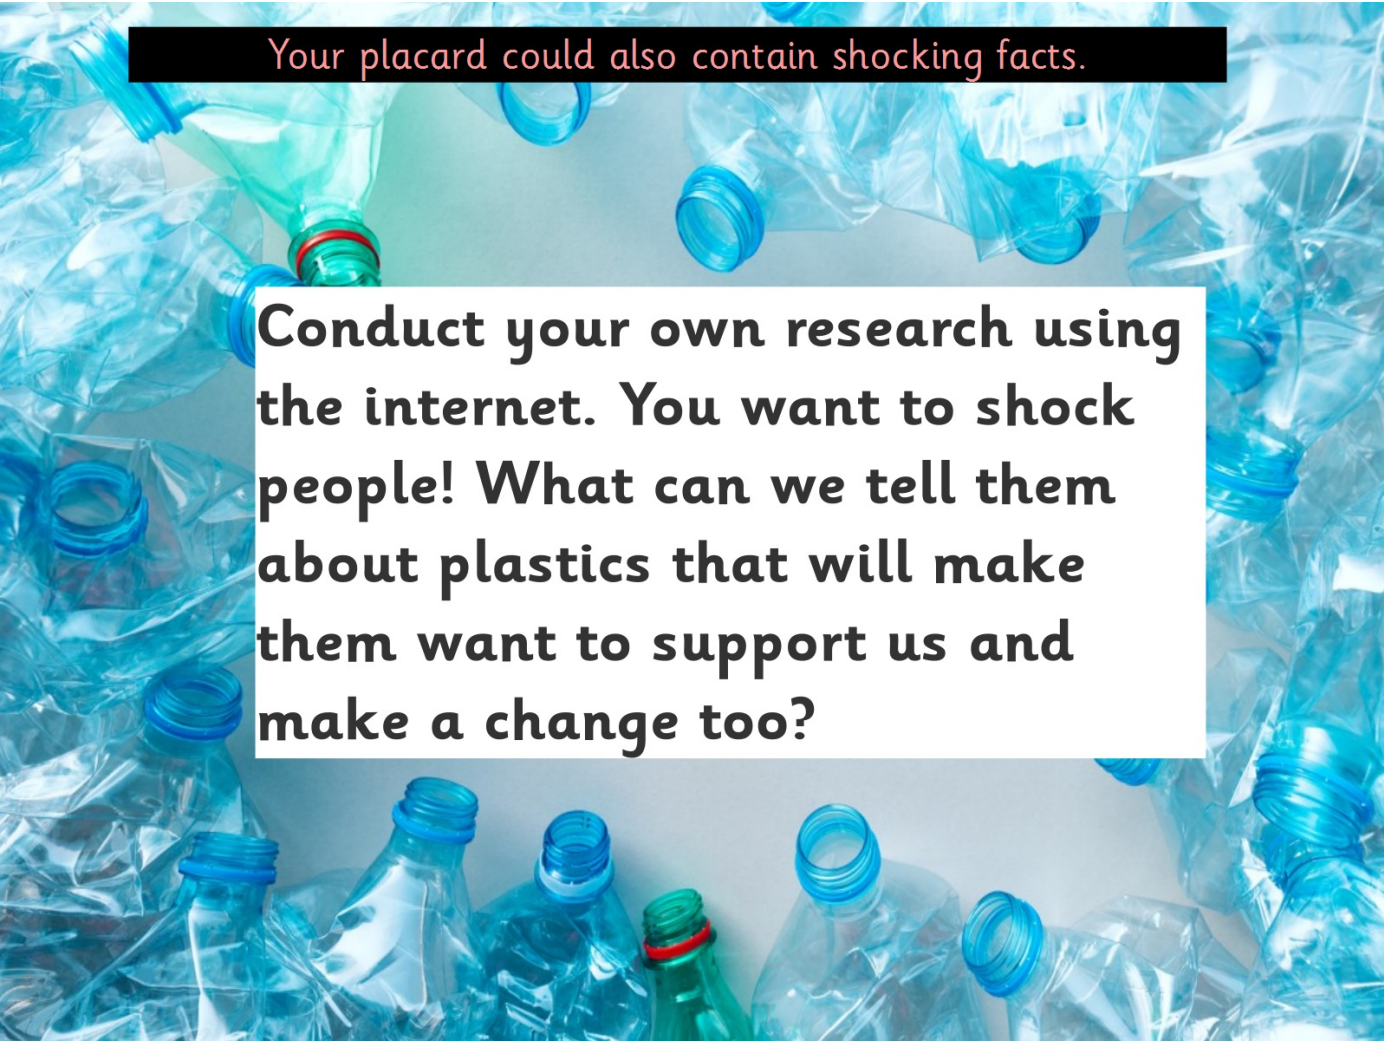

90% of plastic polluting our oceans is carried by just 10 rivers.

73% of beach litter worldwide is plastic.

Plastic is killing more than 1.1 million seabirds and animals every year.

Worldwide, about 2 million plastic bags are used every minute.

A million plastic bottles are bought around the world every minute.

Your placard could also contain shocking facts.

Conduct your own research using the internet. You want to shock people! What can we tell them about plastics that will make them want to support us and make a change too?

Time to create...

Placards are normally quite basic.

Sometimes they have colour,

Sometimes they don't.

**Most of the time they use bold
writing.**

**They sometimes use pictures to
draw attention.**

What will you do?
