

DAVID WIESNER
FLOTSAM

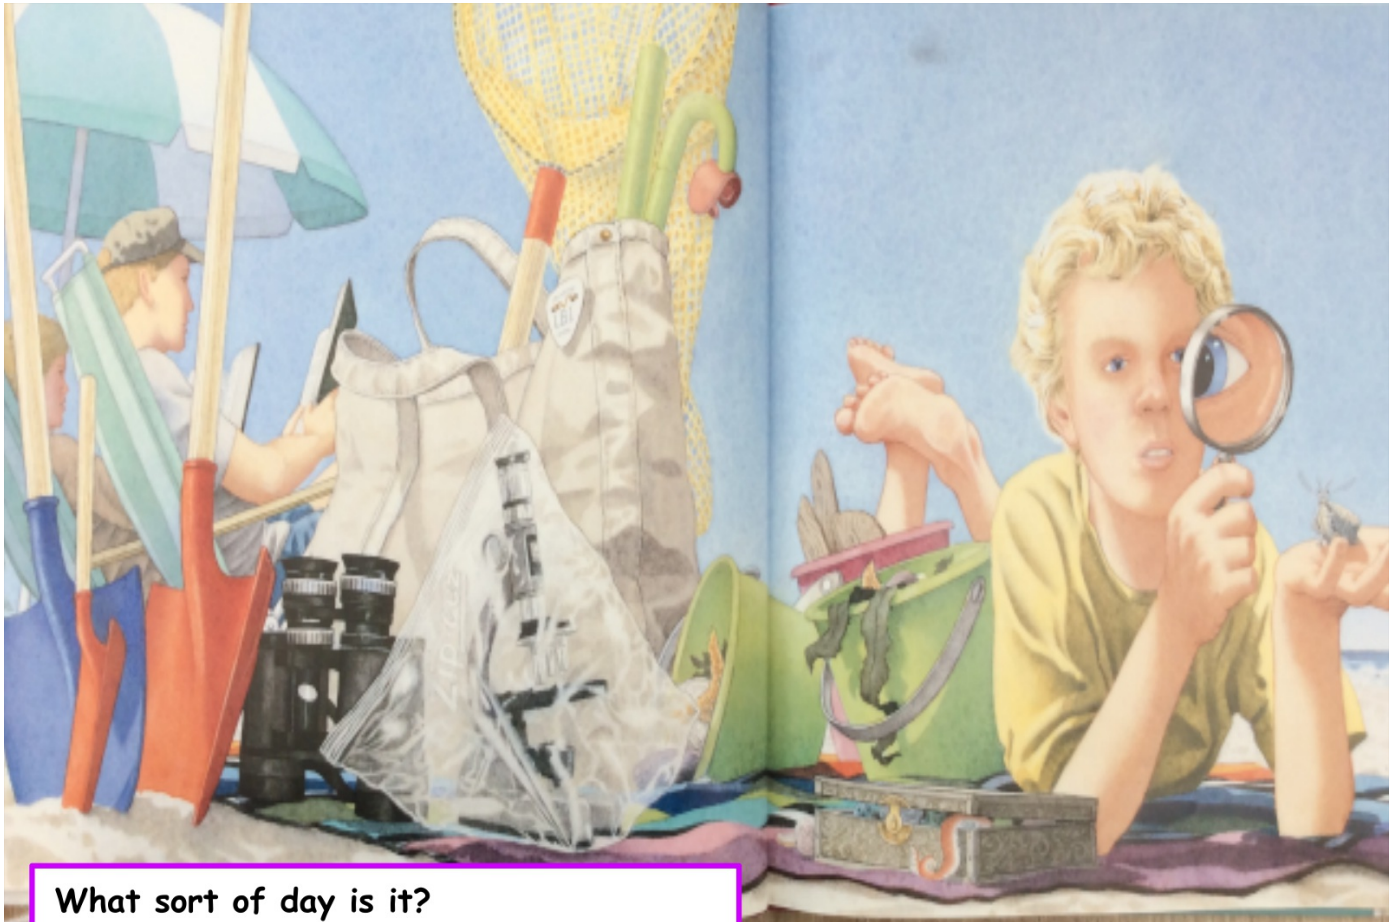

Flotsam:
Something that floats.

If it floats in the ocean
it may wash up on the
beach, where someone
may
find it and be
astonished, and share
the discovery with
someone else.

What can you see?

From the front cover
what could this story
be about?

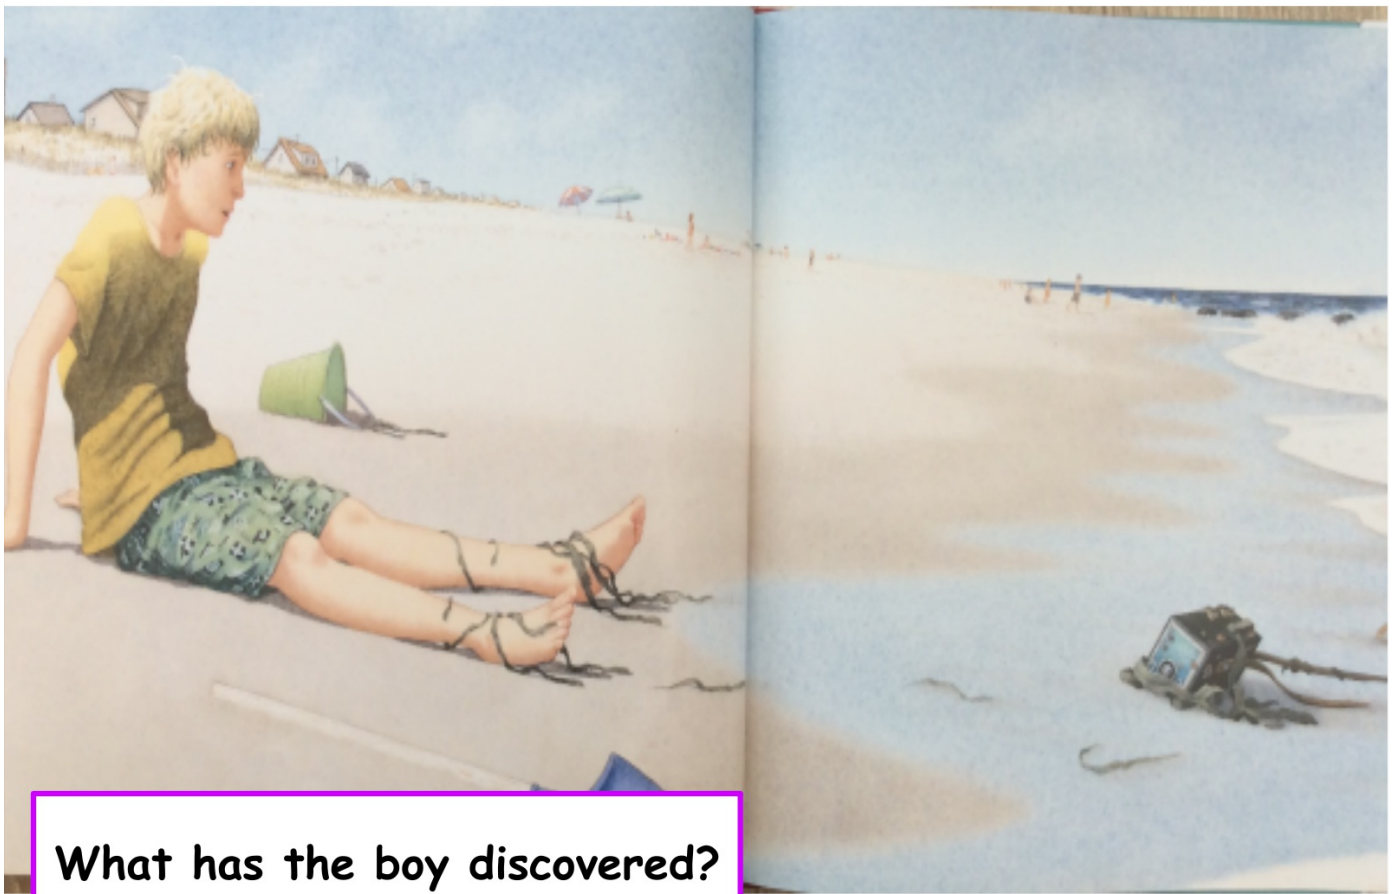

What sort of day is it?

What activities might the boy have done?

What has the boy discovered?

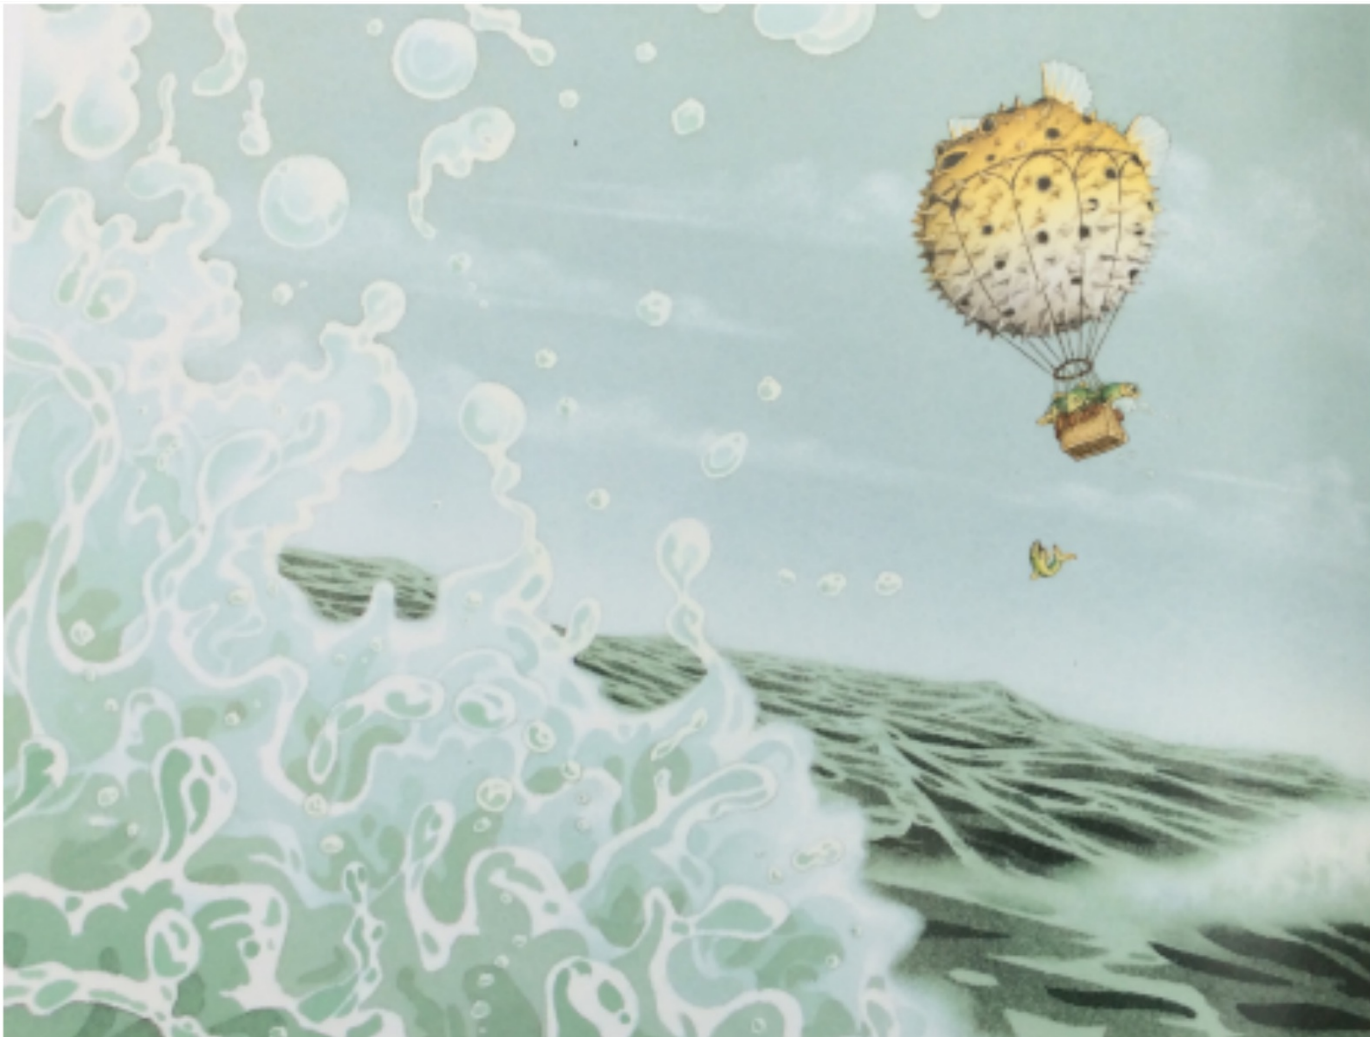

Where has he gone?

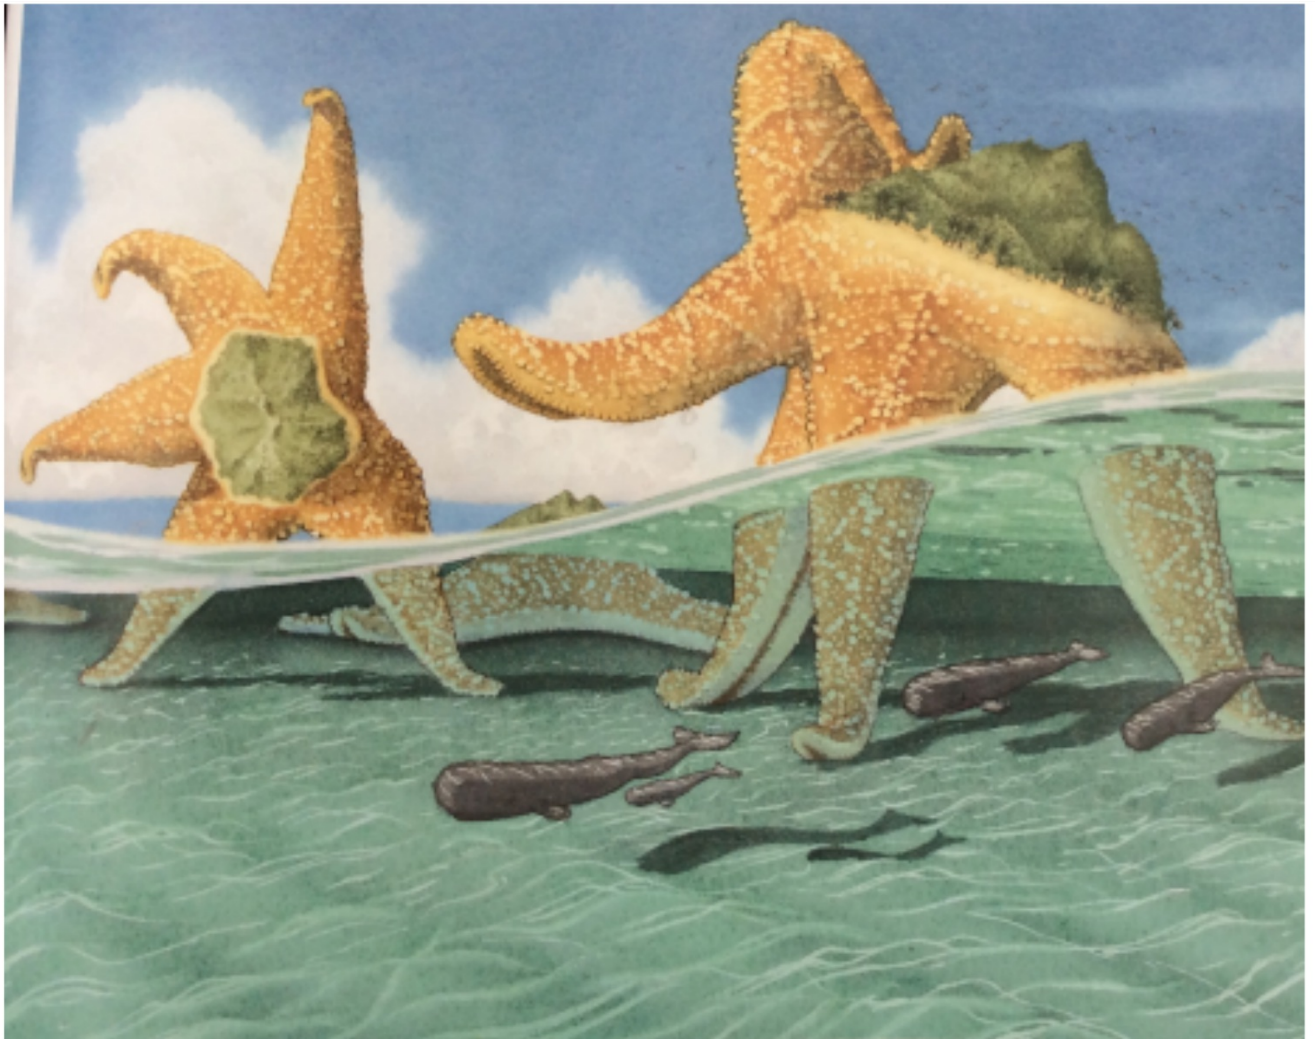

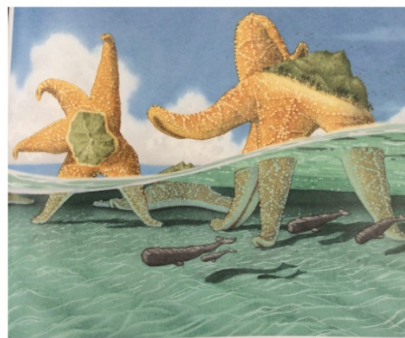

Today we are going to explore some of the strange photographs that the boy discovered on the camera film.

What can you see?

an underwater spaceship

an alien on the back of the fish

a fish swimming

Why have I started
some with a and
some with an?

What would these start
with?

___ ship

___ sea horse

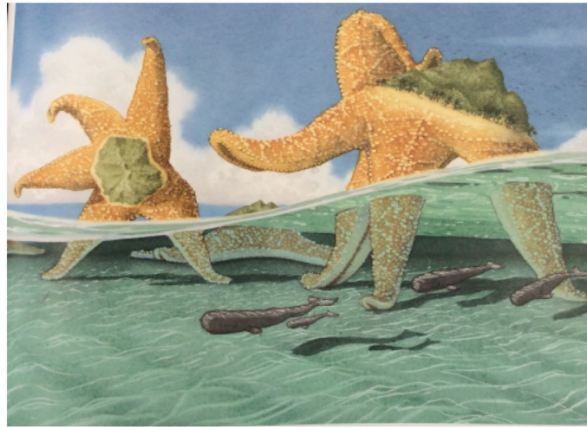

___ glass helmet

You are going to have 2 photographs to study today.

We are going to focus on what we can see today to help us build a setting description in tomorrow's lesson.

I did one for this image:

I can see _____ starfish dancing in the sea. On the back of the starfish is _____ island full of trees.

There is _____ whale in the ocean. _____ group of whales are following behind.

**Can you add
'a' or 'an'
before each
object?**

Use your workbooks to write about what you can see focusing on 'a' and 'an'

What can you see?

What can you see?
