

Tommy buys the car because £4.65 rounds to £5 and he will get change from £5.

Eva buys the panda because this costs £3.05 which is 5p more than £3.00. £3.05 rounds to £3.

Amir buys the rugby ball and the space card because £13.83 rounds to £20 and £5.45 rounds to £5. $£20 + £5 = £25$

If I had £30, I would buy the panda. I would get approximately £27 of change because £3.05 rounds to £3. $£30 - £3 = £27$.
