

Wednesday

Today we are going to be practising some more difficult addition and subtraction ques

True or false

$$\frac{7}{5} + \frac{3}{5} = 2$$

$$\frac{3}{5} + \frac{4}{5}$$

Let's practise turning improper fractions in to m
fraction:

$$\frac{9}{5}$$

$$\frac{10}{7}$$

$$\frac{12}{5}$$

$$\frac{11}{4}$$

$$3\frac{3}{5} + \frac{3}{5}$$

1. $2\frac{3}{5} + \frac{4}{5} =$

5

2. $3\frac{4}{6} + \frac{3}{6} =$

3. $1\frac{5}{7} + \frac{4}{7} =$

$$2\frac{3}{5} + 1\frac{3}{5}$$

$$1\frac{2}{6} + 3\frac{5}{6}$$

$$1\frac{4}{6} + 3\frac{5}{6}$$

1. $4\frac{6}{7} + 3\frac{4}{7} =$

2. $2\frac{3}{5} + 3\frac{3}{5}$

3. $5\frac{2}{3} + 1\frac{2}{3}$

4. $1\frac{2}{3} + \square = 2\frac{1}{3}$

Challenge

Write down 3 more problems, like the ones above, and try to answer them.

$$3 - \frac{2}{7} =$$

$$2 - \frac{3}{4} =$$

$$3 - \frac{2}{5} =$$

$$6 - \frac{1}{2} =$$

Answer these questions

$$3 - \frac{1}{7} =$$

$$6 - \frac{1}{4} =$$

$$5 - \frac{2}{6} =$$

$$5 - \frac{1}{6} =$$

$$7 - \frac{1}{4} =$$

$$3 - \frac{1}{6} =$$

$$8 - \frac{1}{4} =$$

$$5 - \frac{4}{6} =$$

$$5 - \frac{3}{6} =$$

$$10 - \frac{2}{4} =$$

$$3 - \frac{1}{4} =$$

Challenge

1. 'It is a 4 km cycle ride to my friend's house. I have cycled $\frac{3}{4}$ km. How much further do I have to go?'
2. 'I have 5 m of rope. I cut off $\frac{4}{10}$ m. How much rope is left?'
